If the reason is "Thesis preparation of master/doctoral degree," please check "(4) Thesis preparation of master/doctoral degree" on the reverse side and provide specific details about the following.

- Research content (Brief description is acceptable.)
- Reasons why you were unable or did not complete the course in the previous year
- Current research status and expected completion in the current academic year in view of the requirements for university thesis application, etc.

【Supervisor's recommendatory comments】

He is an excellent student and has received high evaluations, including awards at academic conferences. However, since he is engaged in research on advanced cutting-edge technology such as □□□, there are many uncertainties in his research results, and since better research results can be expected by extending his research period, he has decided to extend his enrollment period by one year.

Since all the necessary results for the dissertation are available, I have determined that he is expected to complete his studies during this academic year as follows.

Expected Month of Graduation(Completion): September 2024 (○) March 2025 ()
